Subject: Another opponent of the proposed NPDES permit for Pilgrim

Sir:

The Association to Preserve Cape Cod (APCC) has submitted comments concerning the NPDES draft permit for the Pilgrim Nuclear Power Station. I fully support them. The current NPDES permit expired two decades ago. Harm to Cape Cod Bay has been demonstrated. The draft NPDES permit consequently violates the Clean Water Act. Pollution by this admittedly defunct nuclear plant should not be permitted to continue.

Thank you for your consideration.
